

Amendments to the Claims:

The following listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A non-combustible premix for production of foamed products, said premix consisting essentially of:

at least one polyol selected from the group consisting of polyether polyols and polyester polyols, wherein said polyether polyols and polyester polyols

(a) have a molecular weight of 400 to 10,000,

(b) comprise 2 to 8 hydroxyl groups, and

(c) may optionally contain amino groups, thiol groups or carboxy groups;

from 4 to 35% by weight of a binary blowing-agent mixture, and

10 to 20% by weight of ~~[[a]] flameproofing agent , wherein said flameproofing agent is a phosphorus compound~~ consisting of triethyl phosphate or tris-chloroisopropyl phosphate,

wherein said binary blowing agent comprises a mixture of:

a) 1,1,1,3,3-pentafluorobutane, and

b) ~~1,1,1,2-tetrafluoroethane,~~ 1,1,1,2,3,3,3-heptafluoropropane or 1,1,1,3,3-pentafluoropropane in an amount of at least 5% by weight of the blowing agent.

2. (previously presented) A non-combustible premix according to Claim 1, wherein the premix further comprises a catalyst, a stabilizer, or an additional chemical blowing agent.

3. (original) A non-combustible premix according to Claim 1, wherein the premix further comprises at least one additive selected from the group consisting of reaction-delaying agents, cell regulators, fatty alcohols, dimethylpolysiloxanes, pigments, dyes, fillers, antistatic agents, nucleating agents, pore-regulating substances and biocidal active substances.

4. (original) A non-combustible premix according to claim 1, wherein the premix comprises 10 to 15% by weight of the binary blowing-agent mixture.

5. (canceled)

6. (currently amended) A non-combustible premix according to Claim 1, wherein the premix contains 10 to 15% by weight of said ~~phosphorus compound~~ flameproofing agent.

7-12. (canceled)

13. (currently amended) A non-combustible premix for production of foamed products, said premix consisting essentially of:

at least one polyether polyol having a molecular weight of 400 to 10,000, said polyether polyol comprising 2 to 8 hydroxyl groups, and optionally containing amino groups, thiol groups or carboxy groups;

from 4 to 35% by weight of a binary blowing-agent mixture of 1,1,1,3,3-pentafluorobutane and 1,1,1,2,3,3,3-heptafluoropropane, and

10 to 20% by weight of ~~phosphorus compound selected from the group~~ flameproofing agent consisting of tris-chloroisopropyl phosphate, triethyl phosphate, ~~and mixtures~~ or a mixture of tris-chloroisopropyl phosphate and triethyl phosphate;

wherein said premix has no measurable flash point.

14. (previously presented) A non-combustible premix as claimed in claim 13, wherein said binary blowing agent mixture contains 93 % by weight 1,1,1,3,3-pentafluoro-butane.
